### **Feast of Trinity Sunday**

“God cannot be grasped by the mind. If God could be grasped, God would not be God.”

How complex is our physical construction! Each one of us has 30 trillion cells. Each cell is a mini chemical factory that performs about 10,000 chemical functions. With its 206 bones, 639 muscles, 4 million pain sensors in the skin, 750 million air sacs in the lungs, 16 million nerve cells and 30 trillion cells in total, the human body is remarkably designed for life.

The human brain with the nervous system is the most complex arrangement of matter anywhere in the universe. On average, we process over 10,000 thoughts and concepts each day. In the body there are 30,000 genes making 90,000 proteins.

Trillions of atoms come together for approximately 650,000 hours - the average lifetime. Then the atoms begin to silently disassemble, and go off to other things. There never was something like us before and there never will be something like us again.

One could spend years just dealing with the marvellous intricacies and majesty of God's creation. No wonder we cannot understand the mystery of the Trinity. The God who created each one of us is an unfathomable mystery.

When we use the word ‘mystery’ to talk about the Trinity, we are not talking about a puzzle that is to be solved. The Trinity is the unique relationship of creative love that exists between the Father, Son and Holy Spirit. Through the gift and grace of our baptism and confirmation we are personally invited to be part of this dynamic and life-giving union. As the second reading this Sunday tells us, ‘.... The love of God has been poured into our hearts by the Holy Spirit which has been given to us.

*“Adapted from the writings of Fr. Antony Kadavil and Michael Moore OMI”.*
